

DURAFLEX REFLECTIVE SELF-RIGHTING BOLLARD

Product Code: DuraFlex Reflective Self-Righting Bollard

PRODUCT DESCRIPTION

The DuraFlex self-righting bollard flexes under impact and always returns to its original orientation, minimising the likelihood of injury and vehicle damage. This also reduces the likelihood of needing to replace the bollard following an impact.

The DuraFlex is manufactured from black polymer (white available on request) and the reflective overlay film surface is easily cleaned with water and detergent, with a 6-year delamination warranty.

Installation is either via foundation cage or NAL socket for easy replacement in the event of damage. In addition, the bollard can be retro-fitted to any redundant base light. Please note, NAL adaptor plates are required for all NAL socket compatibility. These are available for purchase if required.

SPECIFICATIONS

Weight	17.00 kg
Width	340mm
Depth	88mm
Height	980mm
Fixing	Surface Mounted
Material	Plastic
Colour	Galvanised
